A story of passion and transmission

FRENCH MANUFACTURING SINCE 1992

This French brand, born in Brittany and **passed down from father to son**, is now established in northern Spain. For more than 30 years, **Carrosserie Ameline** has been designing and manufacturing horse trucks, combining **innovation, experience, and passion**.

Carrosserie Ameline

A story of passion and transmission

Michel Ameline, father and founder of the body shop, began his career as a coachbuilder. In 1992, he decided to start his own company and build his first horse truck. Based in **Plélan-le-Grand**, in Brittany, he developed his first horseboxes on used vans.

Over the years, the **Ameline family** grew alongside the rhythm of horse shows, professional fairs, and bodywork projects.

A pioneer in the design of **monocoque trailers**, Michel presented his first model in **1995 at the Paris Motor Show** – an innovation well ahead of its time and widely recognized in the market.

A new generation

In **2005**, the **Ameline family** moved to **Vilajuïga, Spain**, to continue the adventure. There, **Julien Ameline**, his son, joined the family business and learned all stages of production: design, structure, welding, and technical innovation.

Julien trained in France within the prestigious organization **Compagnons du Devoir**, traveling for five years through different cities and perfecting his craft in various companies. His dedication and passion earned him the title of **Best Apprentice of France – Gold Medal 2005**.

A natural continuity

In **2017**, Julien officially took over the business. Under his leadership, **Ameline designs** evolved – manufacturing was modernized and quality reached an even higher level. The company expanded its presence in Europe while maintaining family values and artisanal know-how.

In **2022**, a new chapter began with the inauguration of the new **Ameline workshops in Vilamalla: 2,500 m²** dedicated to innovation and the goal of producing **100 vehicles per year**.

AMELINE: CLOSE TO THE NEEDS OF RIDERS AND PROFESSIONALS

Recognized throughout Europe, **Carrosserie Ameline** is committed to **comfort, safety, and design**, which are at the heart of every creation. Each vehicle reflects **a family legacy and a constant pursuit of innovation and quality**.

FIAT

AML Ecostar

ENGINE OPTIONS
RENAULT MASTER 170 HP
FIAT DUCATO 180 HP

STANDARD EQUIPMENT

CABIN – 3 OR 5 SEATS

- Airbag
- Automatic climate control
- Radio with Bluetooth and Apple CarPlay
- Cruise and speed limiter
- Emergency brake assist (EBA)
- LED daytime running lights
- Front fog lights
- Rain sensor and automatic light activation
- Lane keeping assist
- Electric windows

BODYWORK

- Composite sandwich panel reinforced with fiberglass fabric, providing superior strength and preventing cracks in the material
- Side ramp + upper door
- Opening with windows and protective grill
- Roof vent
- Large rear door with 110 cm harness compartment
- White paint finish

HORSE AREA

- Table under the horses' heads
- Protective grill in front of the horses' heads
- Fixed removable partition
- Partition between horses' heads
- Anti-slip rubber flooring
- Reinforced side rubbers with nylon fabric
- Rings for tying horses inside and outside

OPTIONAL

SLIDING PARTITION

Easy to use for moving the partition.

LIFT-UP TAILGATE OVER RAMP

TWO DOORS ABOVE RAMP

ADDITIONAL ROOF SKYLIGHT

For better ventilation.

ELECTRIC AIR EXTRACTOR AND FAN

Improves ventilation in the horse area.

STAINLESS STEEL HORSE FIXING BAR

Retractable fixing bar installed at the rear of the vehicle to tie the horses safely.

SULKY HOLDERS

Retractable fixing bar installed at the rear of the vehicle to tie the horses safely.

FOLDABLE BUNK BED

Foldable bunk bed installed behind the cabin area.

ADDITIONAL WINDOW

Helps to improve ventilation.

SWAN NECKS

Positioned above the breast bar or the feeding shelf. The swan neck increases safety for the horses.

PROTECTIVE GRILLS

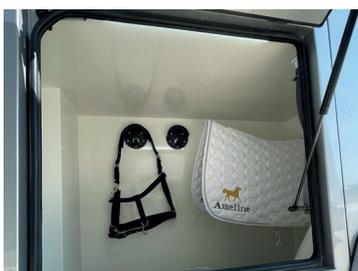

Protective grill in aluminium or stainless steel for better safety and protection of the horses.

WINDOW BETWEEN CABIN AND HORSE AREA

Useful for observing the horse area from the cabin.

EXTERNAL TACK LOCKER

Tack locker with access from the outside for better accessibility to the equipment.

DOUBLE BUNK BED

Spacious sleeping area located above the cabin.

TOW HITCH

DOUBLE REAR DOOR

The double rear door is very useful for access to the tack locker when a trailer is attached.

TWO SLIDING DOORS

Two sliding doors in front of the horses' heads.

CUSTOM-MADE DESIGN

We create a space inside the cabin according to the client's preferences and requirements, within the available limits.

TELEVISION

Small television installed inside the cabin.

SMALL FRIDGE

Small fridge placed under the rear seat.

UPPER SLIDING DOORS

Sliding doors to safely store equipment above the cabin.

STORAGE BOXES

Removable boxes for better organization of the equipment.

EXTERIOR SHOWER

Shower for horses or for filling water buckets.

SHELF

Shelf on the rear part, right or left side, built according to the customer's preference.

SMALL DOORS

Small doors at the rear of the stall area for easier access when there is a lot of material in the tack locker.

SADDLE RACK

Movable rack for Western saddles.

MISTING SYSTEM

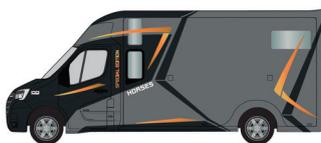

Helps to keep the horse area cool and comfortable during very hot days.

A CABIN TABLE WITH TWO SWIVEL SEATS

A cabin table with two swivel seats: transform your space into a friendly, comfortable, and versatile corner.

CUSTOM DECORATION

Full customization of your vehicle.
